Sandra Haynes, counselor and member of the Counseling Association of South Australia

"Kim Olver has written a delightful book on relationships. She shows a fresh take on relationships and problems. She applies a new rule borrowed from business about abandoning the Golden Rule and

instead applying the Platinum Rule: Treat people the way that they want to be treated. If we could just incorporate the Platinum Rule in our relationships, conflicts would disappear. Kim wisely counsels couples to really get to know one another and further to spend time in introspection and get help for past mistakes made in previous relationships before entering new ones. I recommend it highly for good relationships and even more for relationships having struggles."

John Wilder, marriage, relationship and sexual coach

Despina Gurlides, author of *Not a Guru: One Woman's Spiritual Journey to Happiness*.

"I found this book to be a refreshing look at the elements of successful couples through the eyes of the couples themselves. The variety of stories and first hand examples provided the personal touch that made it especially appealing to me. I think readers will be able to see themselves and find room for improvement regardless of the type relationship they are in."

Marcus Gentry, author of *101 Ponderables*

"Kim Olver, in her book Secrets of Happy Couples, brings a hopeful perspective as one experiences the loss of a loved one, through death, divorce or a break-up. She takes the reader into a journey of empowerment as she suggests we have choices in how we respond to the loss. In life, we may experience a loss of a loved one that we may not understand or that leaves us in total despair. It is when we experience grief. Although this is a normal and necessary process, Kim reminds us that we still have choices, and these are: Leave It, Change It or accept It. Kim makes us aware, above all, that despite any loss, we are capable of finding new possibilities in our lives."

Ligia M. Houben, MA, CG-C, CPC

"Kim writes in an easy to read, conversational tone that I found quite engaging, as if she were speaking just to me. I have been an avid fan of Dr. William Glasser's Choice Theory, having taught it to my clients for many years, and I was thrilled with the way Kim expanded upon the Destructive and Caring Relationship Habits. This is a book that the reader can open to any page and find a gem there. I would definitely recommend Secrets of Happy Couples to my clients and to anyone who wants to create a successful and happy relationship."
